

**GLOBAL AGTECH LEADER:** Missouri is the global leader in agtech and gateway to the future of advanced farming, leading the way with innovative technology and research that is transforming agriculture.

**DYNAMIC CLUSTERS:** Missouri is home to dynamic animal health and plant science clusters supported by agtech research taking place in innovation communities, such as Cortex and MIC, and in world-class educational institutions. More than half of the world's animal health industry is represented in the Kansas City region.

**EXTENSIVE AGTECH INFRASTRUCTURE:** Missouri's agriculture industry contributes \$33 billion in GDP to the state's economy, and generates \$88 billion in sales and more than 378,000 jobs.

**A DIVERSE FOUNDATION:** The state's crop and livestock diversity, abundant water supply, and rich soil provide a solid foundation to Missouri's agtech ecosystem.

**ACCESS TO GROWTH:** Missouri is home to the corporate headquarters of Rabo Agrifinance, part of the Rabobank Group — providing extensive financing and insurance options for U.S. farmers, ranchers, and agribusinesses.
